FOR IMMEDIATE RELEASE

Colorado Engineering Council Honors Professional Engineer from Lakewood Consulting Firm with Award for Outreach and Service

DENVER (June 2, 2017) – The American Council of Engineering Companies of Colorado (ACEC Colorado) recently honored William Green, PE, with its 2017 George Washington Award.

The award honors individuals who give their time and talents to support activities, initiatives and public outreach to advance the public image of consulting engineering.

Green is president of The RMH Group, Inc. (Lakewood, Colo.) and founding president of the Rocky Mountain Regional Chapter of the Design-Build Institute of America, which has provided him with a platform to advocate for the engineering community to improve the design-build procurement process. Green's work has led to a more equitable and transparent design-build process that benefits owners and design-construction professionals alike. Through a national task force that he led, he advocated and achieved elimination of the single-step design-build procurement process for large or technically complex federal projects. Green also led the ACEC Colorado 2014-15 Design Build Task Force, which provided recommendations to the Office of the State Architect that led to a change in Colorado design-build procurement procedures.

The award was presented to Green during a ceremony at the ACEC Colorado Annual Meeting on May 19 at Magnolia Hotel Denver.

###

About ACEC Colorado

ACEC Colorado (www.acec-co.org) is the business association of more than 238 member firms employing approximately 11,900 employees in the independent private practice of consulting engineering. The organization is a primary resource for accessing engineering information, expertise, and business ethics practices. ACEC Colorado provides leadership and direction by developing practical, feasible options and solutions based on technical collaboration to achieve enduring outcomes that benefit society.
