

Curt Dale Seminar

ROLES & RELATIONSHIPS IN DESIGN & CONSTRUCTION

Established over 30 years ago and updated for today, this program will provide owners, architects, engineers, and contractors with an opportunity to improve the communication and quality of the industry.

This session is designed for owners, construction managers, project architects, and project engineers with 3-8+ years of experience.

In-depth training in :

- Understanding the unique perspective of owners, designers and builders
- High performing team behavior
- Pull planning
- Target value design

Meet and interact with other young professionals across the design and construction industries.

Experience the integrated design process and the use of lean thinking through case studies and simulations.

Work in small groups of 6-8 with continuous access to senior level owners, design and construction professionals.

Hosted by A3LC (ACEC, AGC, AIA)

When

March 6, 2018
8:00 AM –4:00 PM
